

Embedding a Survey into Your Website or Blog Using Impressitty

We will walk you through the process of building a survey on Impressitty and integrating it into your website or blog.

Step 1: Register

Create a User Name and Password and login to Impressitty. Then select 'Create Survey'.

Step 2: Begin Creating Your Survey

Identify the title and tags for your survey, then click 'Create Survey'.

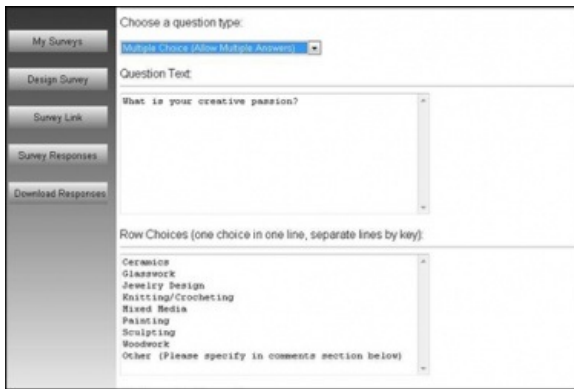

Step 3: Choose a Theme

A theme is the look and feel for how your survey will be displayed online. There are several themes available for you to choose from. Select a theme from the drop-down menu, then click 'Add Question' to begin drafting your survey question(s).

Step 4: Add a Question

Write your first survey question in the text box provided and click the 'Next' button.

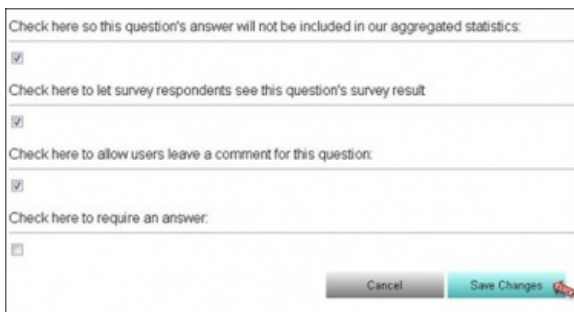

Step 5: Select the Question Type

Identify the type of question you're asking (ie: multiple choice, essay). If your question is multiple choice, provide the available answers in the second text box.

Step 6: Select an Image for the Question (optional)

If you would like to include an image along with the question, you may do so, just make sure you own the copyright or have authorization to use the image you've selected (I have opted not to use an image in this survey).

Step 7: Identify Your Preferences

Designate your preferences for each question within your survey then click 'Save Changes'.

Step 8: Review and Repeat the Process for Additional Questions

Review the format of your question to make sure it looks acceptable. If you would like to add more questions to your survey, select 'Add Question' and repeat steps 4-7.

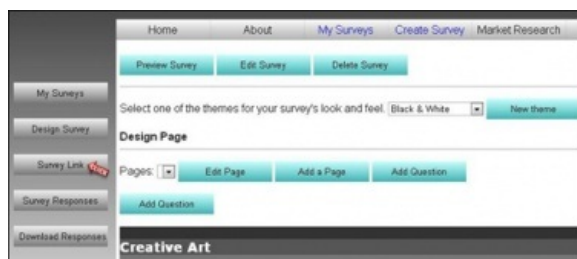

Step 9: Preview

Select the 'Preview Survey' button to view your survey.

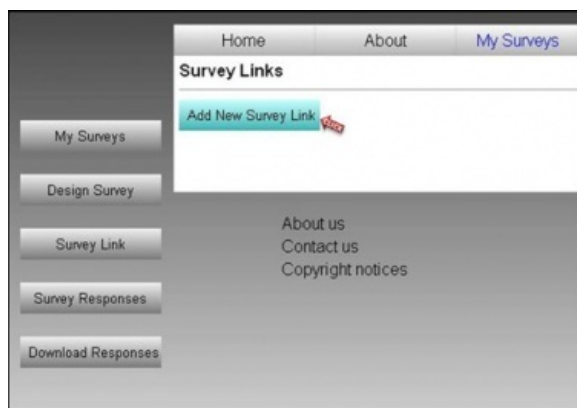

Step 10: Verify Survey

Verify that you are satisfied with how the entire survey looks, then select the 'Back' button.

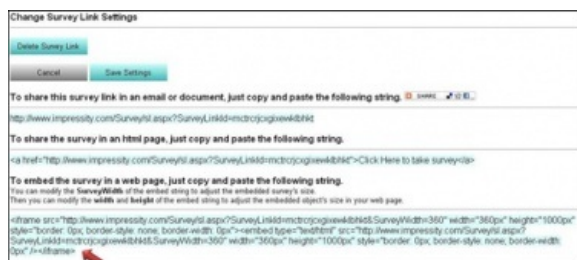

Step 11: Find the Survey Link Button

Find the 'Survey Link' button in the left-hand navigation menu and click 'Survey Link'.

Step 12: Add New Survey Link

Select 'Add New Survey Link' to see available link settings for your survey.

Step 13: Copy and Paste HTML Code

To embed your survey into your website or blog, copy and paste the HTML text from the designated area below into your page. If you don't want to actually embed the survey, you can also choose to include a link where your readers will be led to take your survey outside of your site. (Note that you can adjust the width and height of the survey's size within the HTML text).
