

## How To Create Your Business Cards using MOO

MOO is an online printing company that offers excellent solutions for business cards, postcards, greeting cards and their famous minicards.

### Step 1: Go to MOO

Go to [MOO.com](http://MOO.com) and click on the "Choose a product to make" button.

### Step 2: Choose Your Product

Select the "Make Business Cards" button.

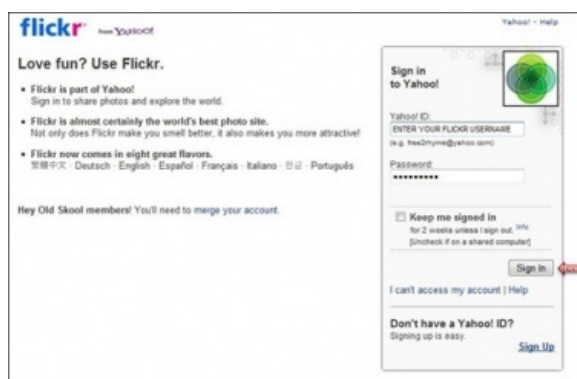

### Step 3: Design Your Business Card

Select the "Start designing your Business Cards" button.

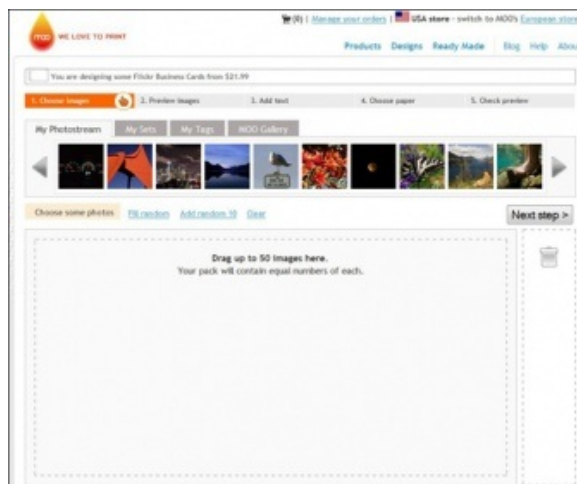

## Step 4: Create Your Design For The Image Side

In this step, you have 2 choices. You can either select to upload your own images for your business cards or use the designs from MOO. I have selected to upload my own images and I can either upload them directly from my computer or MOO offers a great option for me to import my images from [Etsy](#), [Facebook](#) or [Flickr](#). I have chosen to import my images from my Flickr page by clicking on the Flickr button.

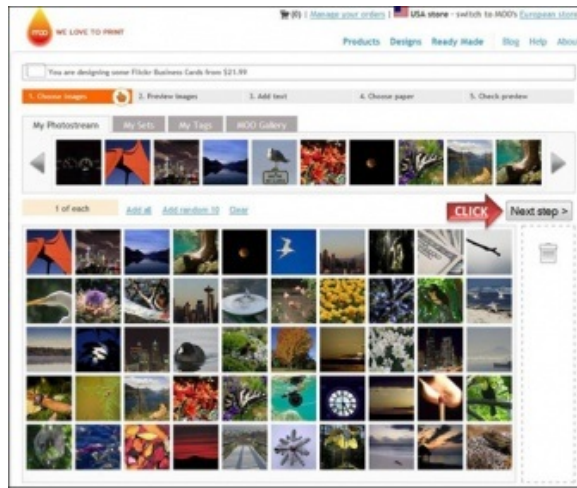

## Step 5: Login to Your Image Account

I have selected to import my images from Flickr so I need to sign in to my Flickr account. If you elected to import from Etsy or Facebook, you will need to sign in to those accounts as well. If you elected to upload your photos, you can skip this step.

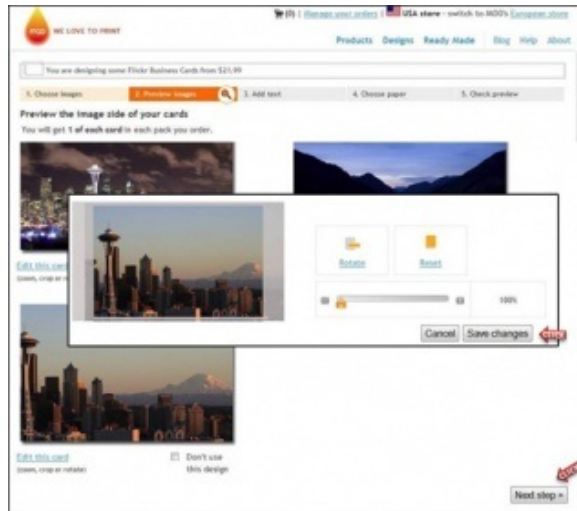

## Step 6: Choose Your Images

This page allows me to drag and drop the selection of images I want for my business cards. I can choose up to 50 images and there are some quick selections like "Fill random" or "Add random 10" if you don't want to go one by one.

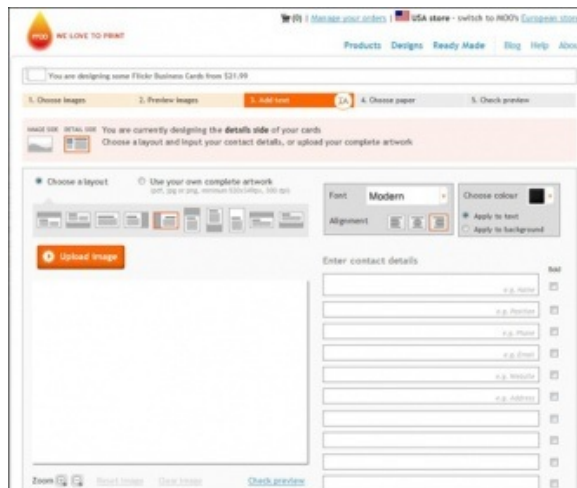

## Step 7: Image Selection

Once you have chosen your images, click on the "Next step" button.

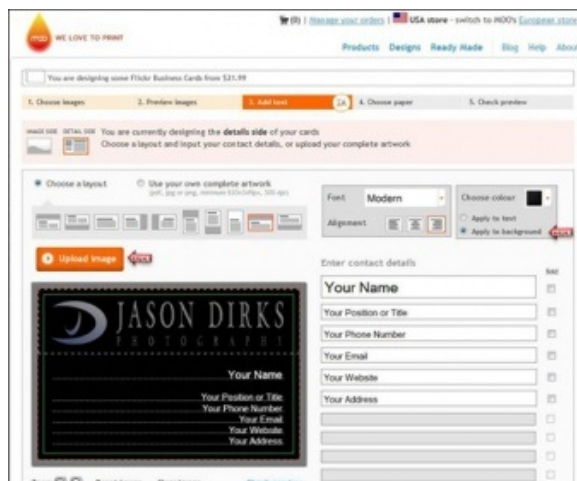

## Step 8: Preview and Edit Images

This step may take a minute or two to get the images ready so be patient. Once the images are available, take a look at them and make sure they look right and click on the "Edit this card" link to adjust the cropping and sizing of the image. I had to adjust the size and cropping of the Seattle skyline below so the Space Needle became visible. Click on "Save Changes" and then "Next Step" when finished.

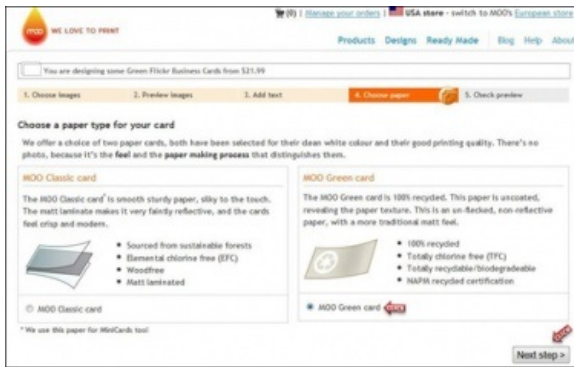

## Step 9: Create Your Design for the Detail Side

Here you can choose a layout and add the text to your business card. You can upload your logo or upload your own complete design all together. I have decided to upload a logo by clicking on the "Upload image" button and I will add the text in the next step.

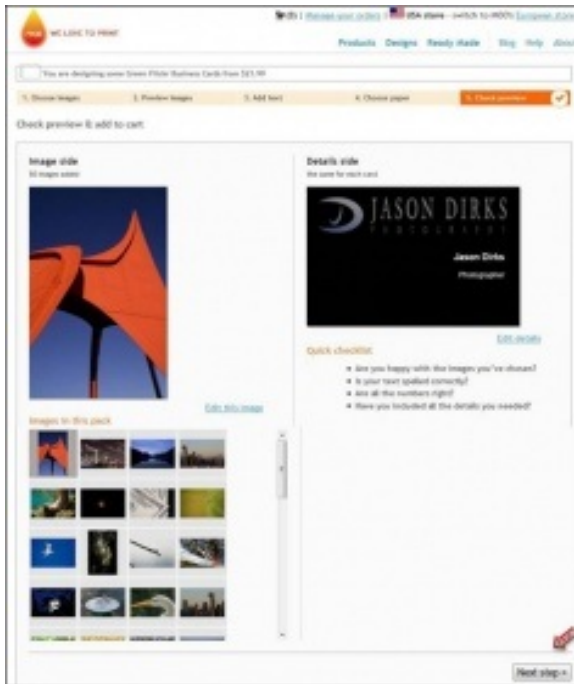

## Step 10: Include Your Contact Details

After uploading your logo, you can resize it using the "Zoom" buttons at the bottom and then add a background color (I've added a black background) if you like. Add your contact details that you wish to appear on your business cards in the fields to the right and click "Next step."

## Step 11: Choose Your Paper Type

Choose between MOO classic business card paper which is laminated and smooth to the touch or MOO's 100% recycled paper which is a more traditional matt feel and click "Next step."

## Step 12: Review Your Business Card

Make sure you are happy with your design and image selection and don't forget to check your spelling and then click "Next step."

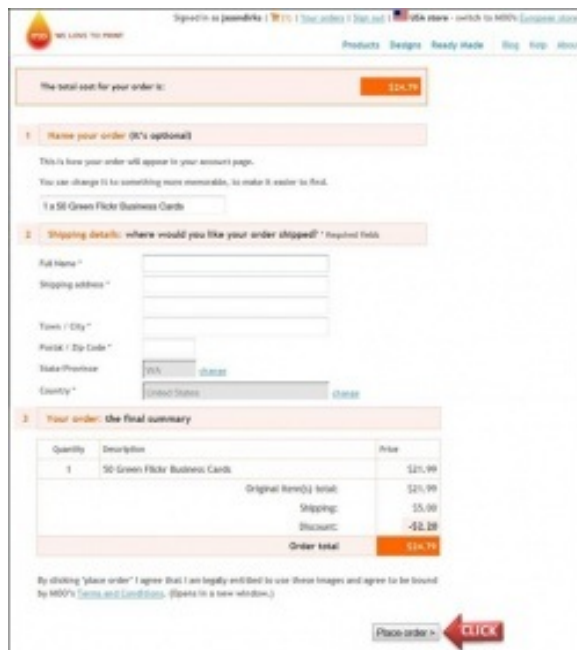

## Step 13: Select Your Quantity

Select the amount of business cards you want and click "Add To Cart."

## Step 14: Confirm Your Order

Confirm your order and then create your MOO account by filling in the information requested.

## Step 15: Enter Shipping and Payment Details

Enter your payment and shipping details and click the "Place order" button.

## Step 16: Your Order is Complete

That's it! You'll get an email from "Little MOO" to confirm your order and provide you with details if you need customer support.
