

How to Put a Facebook Fan Box on Your Blog

Facebook fan boxes are the ultimate way to drive passive visitors to your fan page.

Step 1: Sign In

Go to [Facebook](#) and sign in. If you're new to Facebook, here's [how to get started](#).

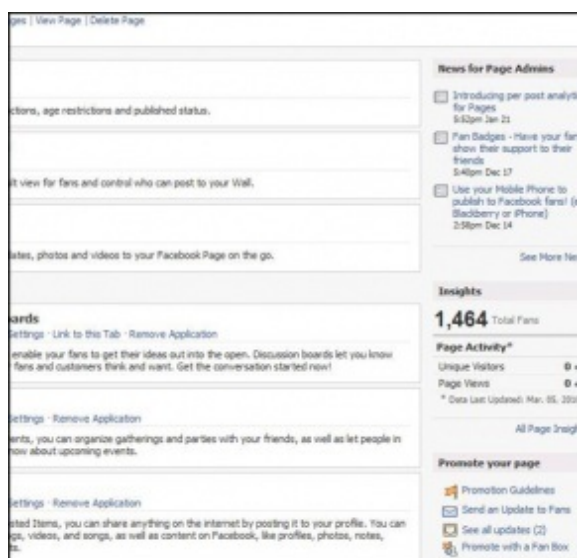

Step 2: Head to Your Fan Page

After you sign in, go to your fan page and click on "edit page". Click here for more tips on [how to use a Facebook fan page](#).

Step 3: Promote Your Page

Scroll down and look for the words Promote Your Page, then click on the "Promote with a fan box" link, which is in the bottom right corner.

Step 4: Design Your Box

Facebook allows you to check off different options for your box so play around until it looks the way you'd like.

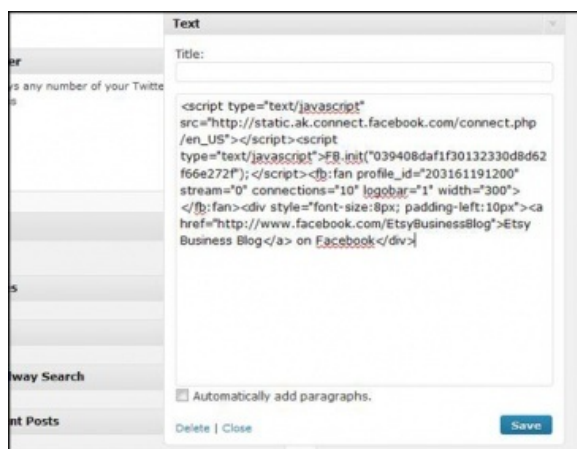

Step 5: Copy Code

When you are finished designing the look of your box, choose where you'd like to add the box and then copy the code that pops out. If you are using Blogger or Typepad, Facebook will automatically connect you from this point and add the widget box for you! If you are using any other platform (such as Wordpress in this case) please continue along.

Step 6: Login to Your Blog

Go to your blog and sign in (in this case we are using Wordpress).

Step 7: Add Your Code

After you have logged in, go to the area where you add your widgets and simply paste the code that Facebook gave you into a new html box or area.

That's it! Give it a second and your Facebook fan box will be displayed on your blog in a flash.
